

Safety First!!

Make sure gun and magazine are unloaded before proceeding with instructions below.

Caution: When loading any magazine, be sure the safety is on. When ejecting a magazine, **DO NOT** rely on gravity, pull magazine clear of gun with thumb and forefinger of weak hand.

1 - Place extender over magazine and, holding with one hand, push down with other hand.

2 - Slide extender to bottom of magazine and snug up set screw with Allen wrench supplied.

3 - Place unloaded magazine into empty gun and move Extender up so it fits closely against the gun. Do not over-tighten (may damage magazine).

4 - Check to see that magazine seats properly in the gun before loading magazine.
